

*Let the breeze in.  
Keep the weather out.*

## **PGT® Eze-Breeze® FOR MORE ENJOYABLE OUTDOOR LIVING**

Add more livability to your screened porch, deck, gazebo or pool enclosure with PGT Eze-Breeze Sliding Panels. They're versatile, attractive, strong and easy to operate. Open, they let in the breeze while screening out insects and debris. Closed, they provide protection from summer sun and changeable weather. Because Eze-Breeze Sliding Panels are uniquely designed and custom-made, they make it easy to enclose your existing porch.

## **VERSATILE VERTICAL FOUR-TRACK PANELS OFFER 75% VENTILATION**

These panels can be custom-made and are available in twin and triple units with a continuous head and sill to fit virtually any space. Their clean lines and pleasing proportions complement the style of any home. The lightweight vinyl-glazed panels can be raised or lowered effortlessly to open up three-quarters of the window area, or can be easily removed and stored for the season, leaving screens in place. Panels tilt in for easy cleaning and can be ordered in tinted colors to reduce solar heat gain.

## **STRONG VINYL GLAZING**

The strong vinyl glazing used in Eze-Breeze Sliding Panels is lighter in weight and more affordable than glass. The tough 10-mil vinyl offers a panoramic view, while keeping wind and weather out. If accidentally distorted, the vinyl will return to its original shape within minutes. If cut or damaged, it can be replaced easily and inexpensively by your distributor.

## PGT® SERIES 100 CABANA DOOR

The PGT Series 100 Cabana Door is an ideal companion to Eze-Breeze. This quality door's 1-3/4" heavy aluminum framing is complimented by our vinyl glazed vertical four track windows, is fully weatherstripped and comes standard with a deadbolt lock. It is manufactured to close tolerances to ensure a strong, dependable door designed to withstand the weather. The door is prehung with three heavy duty hinges in your choice of left or right and is also available as an inswing or outswing door. Standard sizes are 3'0" x 6'8", 2'8" x 6'8" and 2'6" x 6'8". However custom sizes are also available. Door configurations are pictured below and consist of a full style with a 12" kick plate, half style with a 32" kick plate (ideal when adding a pet door), and full view style with no kick plate.
